

M1 Patriot for Security.

M1 Patriot is the ultimate GPS Mobile Phone Software for extreme field operations. The security professional's tool for surveillance and field operations.

Designed for private security professionals and government security operations (Police, Army, Secret Service), M1 Patriot provides a real-time visualisation of your location in relation to the target, other security team locations and local landmarks in the area.

Perfect for extreme security operations, such as Vehicle Recovery, VIP Security and Anti-Kidnapping Operations.

Teams on the field can finally see where the target is going and coordinate other teams on the field even without a command center or line of sight to the target!

M1 Patriot includes global TLD landmark data and is ready to use anywhere in the world!

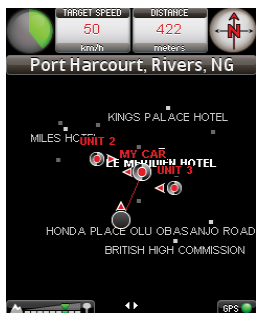

Main Features:

Visual tracking view, which displays Tramigo T22 (target) position with course and speed.

Phone GPS position, with course and distance to target. Nearby Tramigo Landmarks.

Multi-target feature for tracking a whole team in action.

Full Tracking history with visual playback.

See yourself, the target and other teams on one mobile screen.

Select the vehicle to track from a list.

Tramigo M1 Patriot is used together with Tramigo T22, the Best Selling GPS/GSM Tracker in the World.
