

## T22-ADT Power Adapter

The Tamper Proof Power Source.

Designed for maximum security, the T22-ADT provides the most reliable supply of power to your Tramigo T22 Series tracking unit.

T22 ADT for reliable power supply to your T22 unit:

Increase vehicle security and prevent thieves or company employees from disabling your tracking unit with the T22-ADT.

T22-ADT is a transformer and back up battery unit that provides operating power to your T22 Tracking unit from a 8-30v power supply. Fitted in the battery compartment instead of the standard T22 battery, the T22 ADT is then connected to the vehicle power supply.

If vehicle power fails or the power cable is cut, the T22-ADT switches automatically to its backup 380mAh backup battery and can be set to notify you via SMS of the power failure, letting you know instantly that your tracking device is being tampered with.

### Main Features:

- Vehicle power supply & backup battery in one.
- Allows SMS alert if power is disconnected.
- Remains functional even if battery is damaged.
- Easier to install & hide into any vehicle.

Supply Voltage	+8 to +30VDC
Back up battery capacity	380mAh
Storage temperature:	-40 to +85 C°
Operating temperature:	-40 to +60 C°
Power detection low:	0 VDC
Power detection high:	4.3 VDC
