

T22-SUN solar charger

Harnessing the power of the sun.

T22-SUN keeps your Tramigo T22 operational and charges your battery when vehicle/wall power is not available.

With T22-SUN, running out of power will no longer be a problem when your T22 is installed into vehicles or mobile assets without a power source.

T22-SUN is flexible and easy to attach to any asset allowing your T22 to remain operational in sleep mode for years without connection to an external power source or worries about draining your vehicle battery. - Just plug in and enjoy the sun!

T22-SUN is compatible with all Tramigo T22 Series Tracking devices, power supplied varies on the strength of the sunlight.

T22-SUN is perfect for use with:

Trailers, mobile homes and vehicles left idle for long periods.
Machinery or other movable asset without a power source.
Marine vessels without a power source / for long time docking and any remote area operations where access to vehicle or AC power is limited.

Battery charger for T22 portable in outdoor use.

T22-SUN is connected to the T22 unit via USB cable.

Main Features:

- Charges T22 battery in 12 hours on sunny days.
- Flexible, can be bent around objects.
- Easy to install, highly resistant to damage.
- Compatible with all T22 Series Tracking Devices.
