## Tramigo T22

### The Best Selling GPS/GSM Tracking Device in the World

## What is Tramigo T22

Tramigo T22, the best selling and most advanced GPS/GSM tracking device in the world, is designed to work with any GSM phone. T22 brings security and peace of mind without monthly fees, and it is excellent for fleet owners, family users and security services. Tramigo T22 offers ultimate ease-of-use and privacy with in-built detailed TLD Landmarks\* available in your country and in more than 200 countries and GSM areas in the world.

Whether you want to find your car, motorbike, boat or truck or simply drop it into your briefcase, the T22 will let you know where it is by SMS to your mobile phone. Fleet Managers, Security Professionals or private users can use our Free and easy-to-use M1 Fleet PC software and M1 Move, Smartphone Software Tool.

### Main features:

- > Standalone tracking. No annual fees.
- > Inbuilt landmark data of your country.
- > No computers or internet required.
- > Track with any GSM phone.
- > Use T22 with any pre or postpaid SIM card.
- > Easy to install and use.
- > 95x16x20mm, weighing only 126g

## Tramigo For Security

Tramigo is the perfect peace-of-mind tool for everyone. With the T22, you can always check where your car is and for e.g. automatically get notification when your loved ones got home safely.

- Find your car, motorbike or boat with just one SMS.
- Get instantly notified if your vehicle is stolen and shut down engine with SMS.
- Get SMS when the person or asset carrying the T22 starts moving.
- Listen the surroundings of the T22 with the remote microphone accessory.
- Panic Button/Silent Alarm for emergencies

Exclusive to Tramigo devices. This new, patent pending GPS data standard makes Tramigo easy-to-use and affordable for companies and consumers alike. Preloaded with thousands of local landmarks in your country.

## Tramigo for Companies

TRAMIGO  
T22

### The ultimate fleet tracking solution

Track and monitor all your company vehicles either from one PC or the privacy of your mobile phone without monthly fees.

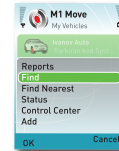

- Prevent unauthorized driving.
- Locate and guide your vehicles.
- Monitor fleet movements.
- Protect unguarded assets.
- Automatic trip reporting.
- Display all vehicles at once on screen
- With the press of a button, turn on several tracking options quickly to closely track stolen vehicles or expensive cargo

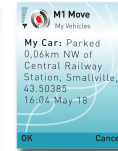

## Free Software!

M1 Move is an excellent smartphone tool for small fleet owners on the move or to enhance your tracking experience with easy-to-use menu and extra features.

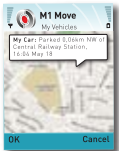

M1 Fleet for PCs is perfect for full-scale fleet management with extensive reporting and security features. Set-up a fleet control center instantly and without monthly fees or 3rd party tracking servers. Your privacy and fleet are secured.

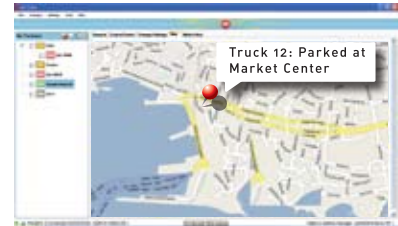

Easy menu navigation.

Instant replies via SMS.

Display TLD on an online map.

M1 Fleet and Move softwares display TLD landmarks on top of an online map, making it instantly understandable.

M1 Move and Fleet softwares enhance the T22, but are not obligatory: T22 can be used with any GSM phone model with easy to use text commands.
