Tramigo and ATCF have agreed to offer Tramigo T22 with special terms to all ATCF members.

Automobile and Touring Club of Finland (ATCF) is the only nationwide association for private motoring in Finland. The ATCF has about 100 000 individual members, 5500 company members and about a hundred different associations and co-operates, which include thousands of motorists. According to its objectives the ATCF is an association established to look after the interests, services and hobbies of individual motorists.

Tramigo T22 is used to track ATCF Smart which gives roadside assistance in Helsinki metropolitan area

Its activities include the entire field of road traffic as well as motoring both in Finland and abroad. Convinced that Tramigo T22 Car device is the perfect device for its members, ATCF chose to offer Tramigo T22 Car as an ATCF member product. ATCF has carefully selected array of interesting and useful products that are offered to members with special terms.

Tramigo T22 Car was chosen as it adds clear value for the members every day by allowing them to control and locate their cars and other assets. Many members also travel outside Finland by car where T22 brings additional peace-of-mind if the car breaks down or gets stolen.

Additionally to ATCF members enjoying peace-of-mind and security brought by Tramigo, some of ATCF Road Service vehicles have Tramigo T22 installed allowing ATCF to know the location of Road Service vehicle and provide roadside assistance even with greater flexibility and speed.

Tramigo Products are currently traded in more than 200 countries worldwide. TLD Landmarks together with distribution and partnership opportunities are available to all countries. T22 Series Products work with any GSM Phone or PC and there are no monthly monitoring or annual subscription fees from Tramigo use.
