

T22 IMMOBILIZER

Protect Your Car and Control Your Fleet! Install a Tramigo T22 Immobilizer now!

The T22-Immobilizer is an optional part of the Tramigo T22 series, it has a feature to disable or immobilize an engine with few commands from an existing mobile phone via text message (SMS). It only requires simple wiring, when done right, an active engine will not start even if the T22 is removed.

Features:

- You can lock down your car by disabling the engine.
- In an event of a theft, you can immobilize the engine for easy recovery.
- Easy to use with multilingual commands.
- Durable, rugged and resistant to damage.
- We have a 12V immobilizer for cars and a 24V immobilizer for trucks.
- You can immobilize your vehicle using any phones or using M1 Move/M1 Fleet
- The immobilizer has an inbuilt IO-cable, which connects directly to the ignition sensing and SOS button without extra wirings

Commands:

Disable, ON - command to immobilize

Disable, OFF - command to unimmobilize

NOTE!

Always make sure to choose a good location.

Be ready to recover your vehicle.

Avoid immobilizing when vehicle is moving.

Stop using locally sourced relays and order your T22 custom immobilizer now.

Tramigo T22-FS version includes T22 Custom Immobilizer FREE of charge. For more information, contact us at sales@tramigo.com
