

# T23 24VOLT

## HEAVY VEHICLE EDITION

**TRAMIGO™**

T23-24V editions are specifically designed for 24Volt heavy machines, trucks and other 24V systems and come with a custom built voltage regulator that shields the tracking unit from potential damage.

## Reliability in 24V Systems

A 24V system may send voltage surges through the system that may damage the tracking devices' sensitive electronics. Built specifically for T23, the voltage regulator protects the tracker from power spikes, ensuring reliable performance compared to trackers not designed for heavy vehicle use.

Designed specifically for 24Volt systems, the 24V voltage regulator enables reliable operation in any heavy vehicle.

Most trackers are not built to cope with 24V systems and run a high risk of damage during ignition or normal operation.

## Custom 24V Immobilizer

Tramigo's custom 24V intelligent immobilizer is compatible with 24V systems and allows remote vehicle ignition and engine shut down in addition to vehicle power and external sensor connections.

### Shipping Info

Shipped without a retail package in a protective plastic bag for maximum cost effectiveness.

Add the needed accessories according to your need:

**T23-ATB** The T23 Remote Microphone and Panic Button are not included in T23 bulk editions but may be added using the following order codes. For a complete list of T23 accessories, contact your dedicated Tramigo representative.

**T23-SOS**

T23 Versions for 24V use:	T23-FS24	T23-FG24
 <b>Tramigo T23 Tracking Device</b> Tramigo's latest vehicle tracker that's perfect for fleet tracking and vehicle security. For more information on T23's features, visit us at <a href="http://www.tramigo.com">www.tramigo.com</a>	✓	✓
 <b>External GPS Antenna</b> Enhances T23's internal antenna and allows double protection and hidden installation in a location less likely to be discovered by thieves or dishonest staff.	✓	✓
 <b>Back Up Battery</b> Allows T23 to continue operation in case vehicle power is cut or damaged. Required for power cut alarm function.	✓	✓
 <b>24Volt Intelligent Immobilizer</b> Connects T23 to vehicle power with remote ignition/engine shutdown via SMS or GPRS, power cut alarms. Includes 1 additional sensor input (i.e. SOS button)	✓	Includes standard vehicle power cables.
 <b>T23 24V Custom Voltage Regulator</b> Shields the tracking device from voltage surges during ignition that may cause device malfunction in heavy vehicle installations. Warranty Note: When connecting Tramigo T23 to a 24Volt system, the T23 Surge Protector is required. 24V installation without surge protection voids warranty.	✓	✓
 <b>Full Software Package</b> Tramigo T23 comes with full smartphone, tablet, standalone PC and control center server software for full online or offline control of your vehicles.	✓	✓
