Idle Alarm Notifies you if the engine has been left running while the vehicle is not moving.	IDLEALARM,30 IDLEALARM,OFF	Sends message if vehicle has been idle for 30 minutes Turns idle alarm off
Zone Alarm Automatically notifies when T23 Track enters or exits a zone set for it.	ZONE,2,OFFICE ZONE,OFF	T23 Track reports when unit enters/ exits within 2km of "office" (requires landmark named "office")
Trip Reporting Notifies you when your T23 Track starts moving and when it completes a trip.	TRIP,ON TRIP,OFF	T23 Track sends a message when a trip starts and ends Turns automatic trip reporting off
Add custom landmark Lets you give a custom name for the units current location.	ADDPLACE,Home DELPLACE,Home	Adds current location as "Home" Deletes landmark named "Home"

OTHER USERS FOR YOUR T23 TRACK

You can track your T23 Track from multiple phones or add access to friends, family or co-workers by adding users. Be careful when giving high level access: Owners have access to all commands, including deleting you from the list of registered users.

"ADDUSER,+123456789,FRIEND"

- OWNER:** Can add and remove users and has full access to all commands.
- FRIEND:** Can set up automatic reporting but has no rights to add/delete users.
- GUEST:** Can only send "FIND" command and receive SOS messages from T23 Track

TRAMIGO T23 Track

Getting started with your T23 Track

Thank you for choosing Tramigo. This guide will help you get started with your T23 Track.

STEP 1: SET UP

Your T23 Track requires a SIM card to communicate location messages using the GSM network. This guide walks you through on how to start tracking on your mobile device using SMS messages.

If using a data-only SIM not able to send SMS messages, please refer to the [GPRS GUIDE](#).

1) Open back cover

Simply press the button to open the back panel

3) Insert battery

Place the battery with the text facing up and close unit cover

Check that your SIM is not protected by a PIN code - Insert the SIM into a mobile phone. Follow your phone instruction manual to remove the PIN lock.

2) Insert SIM card

Slide the SIM card into place with the contact surface facing down. Secure SIM card with security seal.

4) Charge battery

Use the USB cable and a laptop or cigar lighter USB adapter to charge your T23 Track

STEP 2: CONNECT

1) Check the unit has power

Ensure that the power indicator light is blinking in green. If not, go back to step four on the previous page. Other lights may be on momentarily as you power up your unit.

2) Connect to GSM network

Wait for the red indicator light to turn off. Your T23 Track will connect to the network automatically. This may take a few minutes on the first time you are using your T23 Track.

3) Acquire satellite lock

Take T23 Track outdoors to a location with a clear view of the sky and place it so that the Tramigo logo is up. Once the blue GPS light turns off, your unit knows its location.

4) Check indicator lights

Once the power light is blinking and other indicator lights are off your unit is ready to receive the first commands from you.

5) Register as the owner of your unit

Use your mobile phone to send the text message "OWNER" to the mobile # of your T23 Track. Your Tramigo will shortly reply to confirm you as the owner of the unit.

6) Test your Tramigo

Test your unit by sending the SMS message "STATUS" to your T23 Track to ensure your unit has good GPS, GSM and battery status. T23 Track will reply shortly via SMS to your mobile phone.

7) Change your password (optional)

"0000" (four zeros) is the default password of your Tramigo. To prevent other people from accessing your device, change the password into something only you know. To change the password, send the following SMS to your unit:

"PASSWORD,0000,XXXX"

your old password
new password, up to 20 characters long, do not use spaces or special symbols

STEP 3: INSTALL

T23 Track is simple to install, but if you don't have experience in vehicles, please have the unit installed at your reseller or authorized workshop. Refer to the full installation guide for detailed information.

1) Select Location to Install in Vehicle

Choose a location hidden from view that is dry, protected from dust and heat and not blocked by metal. The unit is commonly installed under the vehicle dashboard.

2) Connect T23 Track Vehicle Power Cords to Vehicle Power

Connect **red** wire to 6-24V voltage **positive** source (if 24V please refer to installation guide for details) and the **black** wire to **ground**.

3) Mount unit and plug power cord

Wrap and secure all wiring and mount the unit firmly with cable ties.

4) Test Installation

Send the command "install" to verify installation. Unit will calibrate and check signal levels for one minute and respond the status

TIP:

Make sure to write down the phone# and password of your T23 Track and keep it in a safe place - In case you lose your phone and have to change your number, you can reclaim ownership of your Tramigo by sending "OWNER,1234" [your password] to your T23 Track.

Experience M1 Move

M1 Move makes tracking easy without the need to memorize commands. Download for free by visiting m.tramigo.net on your mobile and following the installation instructions.
