Better fleet management with Tramigo

Why TLD Landmarks are the best solution for vehicle tracking

Our patented TLD Landmarks mapping is customized for Ivory Coast with detailed location information covering nationwide the whole country. Extreme User-friendliness for Extreme Situations! Or in case your vehicle is taken cross-border Ivory Coast TLD Landmarks Version covers all relevant cross-border information.

Tramigo case file:
Date: September 2011
Country: Ivory Coast

Case Study Ivory Coast

- Landmarks are extremely accurate and perfected for tracking and fleet management
- Work faster and easier than traditional map visualization
- Do not require internet connection
- Provide immediately easy-to-understand location everywhere
- Include also neighbouring countries’ landmarks
- Very detailed cross borderer transport route landmarks to neighbouring countries

Landmarks are the only reliable and working solution for vehicle tracking in Ivory Coast... Google Maps and Open Street Map do not have enough data for traditional map visualization.

TLD landmarks work anywhere in Ivory Coast:
Visual mapping products, such as Google Maps and Open Street Map, are not designed for rural areas and vehicle tracking. Tramigo T22 with TLD landmarks is the only feasible tracking solution for demanding environments.

Below live comparison samples why TLD is superior solution in Ivory Coast:
Tracking vehicles with Open Street Map is practically impossible.

Tramigo: En déplacement, 0.15 km SW de Pharmacie Moya, Ville de Abengourou, Moyen-Comoe, CI, 6.731623, -3.505255, NE a une vitesse de 50 km/h, 15:07 Sep 14

Tramigo: Limite de vitesse détecté, en déplacement 0.28 km SE de École Ag Bible, Ville Daloa, Haut-Sassandra, CI, S a une vitesse de 106 km/h, 6.905329, -6.435585, 15:13 Sep 14

Live Tramigo Message from 6.731623, -3.505255
Ville de Abengourou, Moyen-Comoe, Ivory Coast

Live Tramigo Message from 6.905329, -6.435585
Ville Daloa, Haut-Sassandra, Ivory Coast

Live Open Street Map location from 6.731623, -3.505255
Tracking vehicles with Open Street Map is practically impossible

Live Open Street Map location from 6.905329, -6.435585
Tracking vehicles with Open Street Map is practically impossible
Google Maps and Open Street Map in Ivory Coast

- Both have partially poor data coverage
- Some areas have practically nothing data available
- POI data usually not well selected and could be in wrong location
- Data content is not enough for effective tracking and fleet management

Use ADDPLACE feature to customize your TLD

- You can add your own landmarks to maximize TLD functionality
- Add: Home, Office, Check points, Collection points, Fishing sites...
- You can add own landmarks individually one by one
- You can also import landmarks automatically
- Own landmarks works as pre-loaded landmarks
- ADDPLACE is an excellent feature to quickly understand location of stolen vehicle or driver misuse in remote highways
