Better fleet management with Tramigo

Why TLD Landmarks are the best solution for vehicle tracking

Our patented TLD Landmarks mapping is customized for Mozambique with detailed location information covering nationwide the whole country. Extreme User-friendliness for Extreme Situations! Or in case your vehicle is taken cross-border Mozambique TLD Landmarks Version covers all relevant cross-border information.

Tramigo case file:
Date: September 2011
Country: Mozambique

Case Study Mozambique

- Landmarks are extremely accurate and perfected for tracking and fleet management
- Work faster and easier than traditional map visualization
- Do not require internet connection
- Provide immediately easy-to-understand location everywhere
- Include also neighbouring countries’ landmarks
- Very detailed cross boarder transport route landmarks to neighbouring countries

Landmarks are the only reliable and working solution for vehicle tracking in Mozambique. Google Maps and Open Street Map do not have enough data for traditional map visualization.

TLD landmarks work anywhere in Mozambique:

Visual mapping products, such as Google Maps and Open Street Map, are not designed for rural areas and vehicle tracking. Tramigo T22 with TLD landmarks is the only feasible tracking solution for demanding environments.

Below live comparison samples why TLD is superior solution in Mozambique:
Live Tramigo Message from -19.62420, 34.74535
Dondo, Sofala, Mozambique

Live Tramigo Message from -24.71277, 33.88176
Manjacaze, Gaza, Mozambique

Live Open Street Map location from -19.62420, 34.74535
Tracking vehicles with Open Street Map is practically impossible

Live Open Street Map location from -24.71277, 33.88176
Tracking vehicles with Open Street Map is practically impossible
Google Maps and Open Street Map in Mozambique

- Both have partially poor data coverage
- Some areas have practically nothing data available
- POI data usually not well selected and could be in wrong location
- Data content is not enough for effective tracking and fleet management

Use ADDPLACE feature to customize your TLD

- You can add your own landmarks to maximize TLD functionality
- Add: Home, Office, Check points, Collection points, Fishing sites...
- You can add own landmarks individually one by one
- You can also import landmarks automatically
- Own landmarks works as pre-loaded landmarks
- ADDPLACE is an excellent feature to quickly understand location of stolen vehicle or driver misuse in remote highways
